# Sinorbis Technical Test – Front End
Develop a Carousel for a website

1. Next button
2. Previous button
3. Pagination (Each page contains maximum 3 images)
4. Slider should have scrolling animation

Expectation

- Clear and simple logic
- Code quality and readability
- Carousel animation
- Support for devices from mobiles to desktops

Developer can use any front end libraries for Styles and JavaScript, should not use any carousel plugins to achieve the functionality.

Extra points

- Support swipe in mobile
- Support multiple carousels
- Not affecting the global scope
